Most disease begins with a poor immune system. A good oxygenation supply is vital to healthy lives. Aerobic 250c™ boosts 10 million times the oxygen into the blood stream promoting rich healthy blood cells, thus creating better circulation, which enables the body's immune system to heal itself, and fight off disease.

Aerobic 250c™ works at the cellular level permitting oxygen into the blood stream, reducing aging as well as helping the cells rejuvenate themselves.

Once the body is properly oxygenated, it enables you and the horse to maintain stamina and assists in the body's performance with rapid recovery from strenuous workouts and exercise.

Aerobic 250c™ STABILIZED OXYGEN

No other element is as important as oxygen. It is critical to the life process of all living creatures.

Many diseases and bacteria are anaerobic and cannot survive in oxygen. Aerobic 250c™ Stabilized Oxygen, unlike antibiotics, which destroy beneficial aerobic bacteria, will not harm the aerobic bacteria that we require for good health.

Cancer and tumors have difficulty growing in a rich oxygenated environment. Oxygen gives life and energy to cells.

Oxygen is also effective and beneficial when used against anaerobic bacteria including, Salmonella, Streptococcus, Parasites, E Coli, Strangles, Eastern/Western Encephalitis, West Nile, Thrush, and major cuts and abrasions.
